Incinerating toilets

Electric (1,800 - 2,200 W)

Indicates that the ash pan is due for emptying

SELECTED RESULTS FROM THE LABORATORY TEST Incineration time for 1 / 3 / 6 flushes (hrs:min)

Energy consumption for 1 / 3 / 6 flushes (kWh)

Residue after incineration of 1 / 3 / 6 flushes (a)

Possible to start combustion without ash pan

Combustion starts even if the hatch is blocked

Construction quality (assessment scale 1-3, 1=good)

TEST RESULT GRADE 1 TO 5, WHERE 5 IS BEST (WEIGHT IN TOTAL GRADE WITHIN BRACKETS)

Best in test. Good capacity,

fastest combustion and lowest

energy consumption. The only

toilet which takes air from

outside (does not affect the

indoor climate).

3,4

Does not successfully incinerate

at higher loads (requires restart)

Draws most air and has the

largest impact on the indoor

climate. Poorer construction

quality and several safety

criticisms.
